

Summary

Software Engineer with 5+ years of experience designing, building, and optimizing production-grade systems for e-commerce, healthcare, and booking products. Experienced across the full stack with deep expertise in Python (Django) and TypeScript (NestJS), owning features end-to-end from API design and data modeling to performance optimization and background processing, with a solid grounding in system design, event-driven architecture, and infrastructure fundamentals.

Skills

Languages & Frameworks	Python (Django, FastAPI), TypeScript / Node.js (NestJS), REST / gRPC / GraphQL
Data	PostgreSQL, MySQL, MongoDB, Redis, query & schema optimization
Messaging & Workflows	Kafka, Debezium CDC, NATS JetStream, Celery, Temporal
Infrastructure	AWS, Google Cloud, Docker, CI/CD, Nginx, Turborepo monorepo

Work Experience

Arobid Tech JSC · Backend Engineer	02/2026 - Present
Gkim Digital Ltd · Backend Engineer	09/2024 - 02/2026
Golden Owl Consulting · Software Engineer	03/2022 - 09/2024

Projects

Arobid B2B Marketplace Platform · Backend Developer

Stack: NestJS, TypeScript, PostgreSQL, TypeORM, gRPC, Kafka, Debezium CDC, Temporal, Redis, VNPay

- Helped build the shared microservice foundation: service setup, configuration, database access, gRPC communication, error handling, and observability used across all platform services.
- Designed platform-wide authentication, RBAC, audit logging, and transactional outbox patterns; implemented CDC pipelines with Debezium and Kafka Connect for reliable event delivery.
- Delivered end-to-end product listing with review/approval workflows, optimistic locking, and version history to protect concurrent edits.
- Contributed to Temporal-based order orchestration and built VNPay payment workflows covering initiation, callbacks, and transaction tracking.
- Built a provider-agnostic translation service (internal AI, Google Translate, LLMs) with per-language fallback chains, glossary protection, caching, and batch processing.

DNA Insights Platform · Backend Developer

Stack: NestJS, TypeScript, PostgreSQL, MongoDB, gRPC, NATS JetStream, Turborepo

- Designed and built an event-driven, microservice-based backend platform from scratch in a Turborepo monorepo with clear service boundaries and ownership.
- Owned backend architecture decisions for internal service communication and asynchronous processing, integrating with external AI/ML pipelines.
- Designed reliable workflows for long-running DNA processing tasks: state tracking, retries, failure recovery, and auditability across PostgreSQL and MongoDB.
- Built internal admin tools giving operations teams visibility into system state and processing progress.

Telehealth Core Platform · Backend Developer

Stack: Django, Python, PostgreSQL, AWS, Celery, NMI, Stripe, React

- Maintained and evolved a production telehealth platform supporting patient, provider, and laboratory workflows.
- Optimized PostgreSQL queries, schema design, and connection handling, improving API performance and system stability.
- Designed and maintained Celery workflows for asynchronous processing and scheduled jobs; integrated NMI and Stripe payment flows for telehealth billing.
- Collaborated with frontend and product teams to design stable, well-defined APIs and consistent data flow.

E4G Multi-Tenant Healthcare Platform · Backend Developer

Stack: NestJS, TypeScript, Django, PostgreSQL, REST APIs, Webhooks, RBAC

- Built multi-tenant foundations: tenant provisioning, data and configuration isolation, RBAC, and separate global/tenant administration.
- Enabled healthcare partners to launch branded patient portals with configurable offerings and appointment booking, synchronized via webhook-driven workflow templates.

Finexis eKYC · Software Engineer

Stack: Django, Python, MySQL, Celery, AWS

- Built new eKYC verification types and RESTful APIs for mobile integration, with Celery background processing and third-party insurance API integrations.
- Optimized SQL queries and database structure, cutting representative page load times from 23s to 2s and from 26s to 5s.
- Refactored legacy code to improve maintainability and data-access efficiency.

The Luxe Nomad · Software Engineer

Stack: Django, Python, PostgreSQL, Celery, GCP, ReactJS, Bootstrap

- Designed Django REST APIs and third-party integrations for booking, sales, marketing, and automated reporting (Google Sheets API) in a luxury vacation rental platform.
- Migrated Celery tasks and cron jobs to Google Cloud Tasks and managed scheduling; upgraded Django 2 to 4.
- Managed deployment, performance, security, and cloud cost; consulted directly with the client on business requirements.

Watchtower · Fullstack Developer

Stack: NextJS, NestJS, ChakraUI, Apollo, GraphQL, Kafka

- Developed GraphQL APIs and frontend features for onboarding and managing external security assets on an exposure-management platform.
- Implemented automated PDF report generation and maintained production services, improving overall reliability.

Hoplite Technology · Software Engineer

Stack: TypeScript, ReactJS, NextJS, Python, AWS Lambda, FastAPI, MongoDB, Nginx

- Built AI-powered chat tools with NextJS and the OpenAI API; designed serverless REST APIs with AWS Lambda and API Gateway.
- Implemented streaming responses to work around API Gateway timeouts; optimized page load and API responsiveness; set up Nginx reverse proxy.

TurisVPN · Backend Developer

Stack: Django, Python, Celery, CKEditor

- Built a scheduled email campaign feature for marketing using CKEditor 5 and Celery.
- Set up performance debugging tooling and fixed N+1 query issues, speeding up data-heavy Django Admin pages.

Clinger · Backend Developer

Stack: NestJS, TypeScript, PostgreSQL

- Developed core backend features (profiles, matching, messaging) for a mobile dating app; integrated automated nudity detection for content safety.
- Redesigned database schemas and optimized queries to improve data integrity and responsiveness; refactored legacy modules for maintainability.

Education

Ho Chi Minh City University of Technology · Electrical Engineering (Telecommunication), P.F.I.E.V

2017 - 2022
