

SUMMARY

Software Engineer with 5+ years of experience delivering product features and production systems across B2B commerce, healthcare, fintech, travel, cybersecurity, and consumer products. Strongest in turning business workflows into reliable APIs, integrations, background jobs, and full-stack features, with hands-on delivery from product requirements to production rollout.

SKILLS

Languages & APIs	Python, TypeScript, JavaScript, REST, gRPC, GraphQL
Frameworks	Django, FastAPI, NestJS, Node.js, React, Next.js
Data	PostgreSQL, MySQL, MongoDB, Redis, query & schema optimization
Messaging & Workflows	Kafka, Debezium CDC, NATS JetStream, Celery, Temporal
Infrastructure	AWS, Google Cloud, Docker, CI/CD, Nginx, Turborepo monorepo

WORK EXPERIENCE

Arobid Tech JSC · Backend Engineer

02/2026 – Present

Arobid B2B Marketplace Platform

NestJS · TypeScript · PostgreSQL · TypeORM · gRPC · Kafka · Debezium CDC · Temporal · Redis · VNPay · FAST · MySign

- Delivered core marketplace features for supplier catalogs, RFQs, orders, payments, invoices, e-signature, rewards, notifications, translation, and digital expo operations.
- Shipped supplier product listing end to end: creation, media/files, review and approval, optimistic locking, and version history to protect concurrent edits.
- Delivered order and transaction workflows end to end, including Temporal orchestration, VNPay payments, FAST invoice workflows, MySign e-signature, and Trade Credit rewards.
- Built marketplace platform capabilities used across domains: authentication, RBAC, audit logging, transactional outbox, Debezium/Kafka CDC, and shared service foundations.
- Shipped multilingual content workflows using internal AI, Google Translate, and LLM providers with fallback routing, glossary protection, and caching.

Gkim Digital Ltd · Backend Engineer

09/2024 – 02/2026

DNA Insights Platform

NestJS · TypeScript · PostgreSQL · MongoDB · gRPC · NATS JetStream · Turborepo

- Delivered AI-assisted DNA processing workflows from intake through long-running task execution, state tracking, retries, failure recovery, and operations visibility.
- Built the event-driven backend behind the workflow, including service boundaries, data models, gRPC/NATS communication, and external AI/ML pipeline integration.
- Shipped internal admin tools for operations teams to inspect processing state, task progress, and failures across PostgreSQL and MongoDB.

Telehealth Core Platform

Django · Python · PostgreSQL · AWS · Celery · NMI · Stripe · React

- Delivered backend features for patient records, provider operations, laboratory interactions, appointments, and care workflows on a production telehealth platform.
- Shipped telehealth billing workflows with 2 payment providers (NMI and Stripe), plus Celery jobs for asynchronous processing and scheduled operations.
- Improved API performance and stability through PostgreSQL query optimization, schema tuning, and connection handling improvements.
- Collaborated with frontend and product teams to design stable, well-defined APIs and consistent data flow.

E4G Multi-Tenant Healthcare Platform

NestJS · TypeScript · Django · PostgreSQL · REST APIs · Webhooks · RBAC

- Delivered multi-tenant SaaS features for healthcare partners: tenant provisioning, branding, configurable offerings, appointment booking, and patient-facing portals.
- Built global and tenant-level administration with data/configuration isolation, RBAC, and webhook-driven workflow template synchronization.

Golden Owl Consulting · Software Engineer

03/2022 – 09/2024

Finexis eKYC

Django · Python · MySQL · Celery · AWS

- Delivered digital onboarding features for eKYC verification, mobile REST APIs, background processing, and third-party insurance integrations.
- Optimized SQL queries and database structure, cutting representative page load times from 23s to 2s and from 26s to 5s.
- Refactored legacy backend modules and data access patterns to improve maintainability and delivery speed.

The Luxe Nomad

Django · Python · PostgreSQL · Celery · GCP · ReactJS · Bootstrap

- Delivered booking, sales, marketing, and reporting workflows through Django REST APIs and third-party integrations in a luxury vacation rental operations platform.
- Migrated Celery tasks and cron jobs to Google Cloud Tasks and managed scheduling; upgraded the production application from Django 2 to Django 4.
- Managed deployment, performance, security, and cloud cost; worked directly with the client on business requirements.

Watchtowr

NextJS · NestJS · ChakraUI · Apollo · GraphQL · Kafka

- Delivered asset onboarding and management features with GraphQL APIs and frontend workflows for an exposure-management platform.
- Implemented automated PDF report generation and maintained production services, improving overall reliability.

Hoplite Technology

TypeScript · ReactJS · NextJS · Python · AWS Lambda · FastAPI · MongoDB · Nginx

- Delivered AI-powered chat experiences with NextJS and the OpenAI API; designed serverless REST APIs with AWS Lambda and API Gateway.
- Implemented streaming responses to work around API Gateway timeouts; optimized page load and API responsiveness; set up Nginx reverse proxy.

TurisVPN

Django · Python · Celery · CKEditor

- Delivered a scheduled email campaign feature for marketing teams using CKEditor 5 and Celery.
- Set up performance debugging tooling and fixed N+1 query issues, speeding up data-heavy Django Admin pages.

Clinger

NestJS · TypeScript · PostgreSQL

- Delivered core mobile dating features (profiles, matching, messaging) and integrated automated nudity detection for content safety.
- Redesigned database schemas and optimized queries to improve data integrity and responsiveness; refactored legacy modules for maintainability.

EDUCATION

Ho Chi Minh City University of Technology · Electrical Engineering (Telecommunication), P.F.I.E.V

2017 – 2022
